DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nguyen, U.S.P.

No.5,940,209.

Nguyen 209' teaches (Figs.1-2) a method and apparatus of switching optical signals from a plurality of input circuits to one of a plurality of output signals (Note although a single input and output is shown; a plurality can be used in an optical network.) comprising a plurality of optical amplifiers 31,32,38 and monitoring the output of the optical amplifiers using detectors 45,47 and feedback loops so that a particular monitor circuit can be selected which selects a particular amplifier so that a particular optical signal is amplified based on the feedback signal, which clearly, fully meets Applicant's claimed limitations.

A copy of PTO-1449 is being included with this office action.
